## tone

At the heart of the CA-X's superb piano sound is Kawai's acclaimed Harmonic Imaging sound technology. Able to re-create the entire dynamic range of the hand-crafted EX Concert Grand Piano, Harmonic Imaging produces an acoustic piano sound of remarkable depth, expression and realism.

Along with its variety of Grand Pianos, you'll find dozens of other useful sounds - electric pianos, strings, organs, even vocal, synth and bass sounds. And, any two sounds can be combined together in a DUAL or SPLIT mode.

## touch

Credit the CA-X's wooden-key, graded hammer AWA PRO action for its unsurpassed feel. Following the mechanical principles of our grand piano actions, the AWA PRO is simply the finest action available in a portable digital piano.

## get connected

The CA-X sports a variety of connection jacks. Stereo Line Outs provide output to a sound system or audio recorder. You and a friend, or student, can listen privately through headphones with the two headphone jacks. USB and MIDI supplies connectivity to computers and other devices, and the pedal jack connects the supplied F1r pedal or optional F2r dual pedal.

## beautifully simple

The simple design and operation of the CA-X is a welcome change from the difficult and confusing operation of many professional instruments. But don't let the simple operation fool you. There are plenty of powerful features just below the surface waiting to be explored.
