

KAWAI DIGITAL PIANO

CE200

The finest touch available, exquisite sound quality, and powerful features... all in an affordable and easy to use digital piano from the leading builder of fine acoustic pianos.

CE200

DIGITAL PIANO

The True Touch of a Grand Piano

The CE200 features Kawai's award-winning AWA PROII keyboard action. Utilizing long wooden keys, this action recreates both the weight and movement of our grand piano actions. Possessing an amazingly authentic piano feel, the AWA PROII is quite simply the finest digital piano action available.

Exceptional Sound

The key to the CE200's exceptional sound is Kawai's acclaimed Harmonic Imaging technology, capable of recreating the rich, vibrant sound of our 9-foot EX Concert Piano... from thunderous fortissimos to the most delicate pianissimos. Thanks to this revolutionary process, the CE200 contains a remarkable recreation of not only our concert grand piano, but many other instrument sounds as well.

Powerful Features

The CE200 is packed with dozens of features. For starters, any two sounds can be played together in a layered or split keyboard. Virtual Voicing and Brilliance control allow you to mold the sound to your personal taste. User Touch can tailor the keyboard's "feel" to your unique playing style. Damper Effect, String Resonance, and Half-Damper all add to the instrument's realism. There's even built-in classical Piano Music (with songbook) for your listening and learning pleasure.

Sound Source Harmonic Imaging Sound Technology
