

THE EXCELLENCE WITHIN

THE WORLD'S MOST PRECISE PIANO ACTION

The 606 Consoles feature our exclusive Ultra-Responsive™ Direct Blow action that offers extraordinary feel and touch. Hammer heads are made with 100% wool felt. Hammer shanks and mouldings are made with top-quality maple. To make the action resistant to climatic and seasonal changes in temperature and humidity, we pioneered the use of aluminum action rails, aluminum hammer rest rails and precision parts made of extremely stable, low-friction ABS Styran.

EXCLUSIVE ABS STYRAN ACTION PARTS

The innovative use of ABS Styran in all our piano actions is one of the chief reasons why a Kawai piano will maintain stable touch and tone over time better than other pianos. Endorsed by leading piano technicians and proven superior in scientific tests, ABS Styran is supported by over thirty years of proven reliability in Kawai pianos.

SOUNDBOARD AND RIBS

The most important sound-producing parts of a piano are the soundboard and ribs. The choice of materials and the manner in which they are assembled can greatly affect volume and tone quality. Our wood technologists select only the finest spruce to ensure exceptional dynamic range and superb tone across the entire spectrum of sound. The 606 Consoles boast an exceptionally large soundboard area (2,015 sq. in.) for greater tonal power and resonance.

BACK POSTS

Back posts support the plate and help maintain its structural integrity over the life of the piano. Our laminated back post construction is designed for maximum rigidity to provide enhanced tuning stability for decades of reliable performance.

"MATCHED STRENGTH" PLATE DESIGN

The cast iron plate of an upright piano is subjected to as much as 20 tons of string tension. To enable our plates to withstand this tremendous stress, we use state-of-the-art CAD technology to match the strength and natural tonal resonances of the plate to the requirements of the scale design. The proper combination of plate design, back post structure, and string tension provides an extraordinary foundation for outstanding tone.

PINBLOCKS

A pinblock must be constructed and finished to the highest quality standards to ensure maximum tuning stability. At Kawai, we make our pinblocks from the finest hard rock maple and utilize machine-cut thread, reverse-torque tuning pins for easy tuning.

STEEL FRAME KEYBED

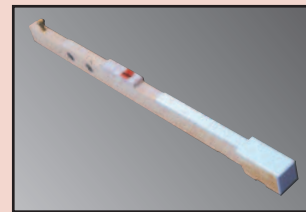

The steel frame keybed on the 606 Consoles is tremendously strong and stable. Because steel resists shrinking, swelling and warping due to changes in climate, the 606 keybed provides an excellent foundation for the action assembly that will remain consistent over many years of performance.

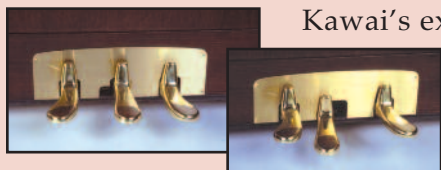

THE KAWAI 606... High Performance and Style

LONGER KEY STICKS

The 606 cabinet is built with added depth (25") to accommodate a longer key length for better control. The extended 16 1/4" inch keys offer greater leverage at every point of the playing surface for a more even, controlled touch.

CAST BRASS PEDALS

Center Practice Pedal

Kawai's exclusive Cast Brass Pedals are extremely resilient. Made with a permanently bonded brass finish over a die-cast aluminum core, Kawai Cast Brass Pedals are significantly stronger and more durable than traditional "capped" upright piano pedals. The center pedal activates the mute rail for quiet practice playing.

SQUARE-TUBE PEDAL LEVERS

Square-tube steel pedal levers are stronger than traditional round levers. Plus, the square design provides a flat surface for pedal wingnuts to reduce the possibility of noise when the pedals are depressed.

TEN YEAR FULL WARRANTY

To ensure your peace of mind and protect the value of your investment, every Kawai upright piano is covered by our Ten Year Fully Transferable Warranty. This warranty is the seal of Kawai craftsmanship... and the assurance of your satisfaction for many years to come.

A Never-Ending Quest For Perfection

606 CONS

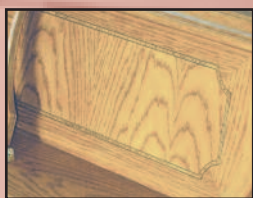

COMBINING CLASSIC BEAUTY AND EXCEPTIONAL

The 606 Series Console Pianos are the product of superb craftsmanship both inside and out.

They are, above all, musical instruments of exceptional caliber. A soundboard of select solid spruce and a sturdy back assembly (with five laminated back posts) establish an excellent foundation for superb tone and long-term tuning stability. Our exclusive Ultra-Responsive™ Direct Blow action, regarded by many as the most precise piano action in the world, provides a consistent *touch* that is unsurpassed.
