

DESIGNED FOR THE DEMANDING MUSICIAN

Musicians who insist on durability, value and quality in a studio piano will appreciate the Kawai UST-8C. It's a tough performer that can handle hard knocks and always sounds great.

The UST-8C delivers superb sound quality in any venue. It features a larger soundboard and longer strings than many grand pianos. Heavy-duty casters help the UST-8C accompany you from the studio, to the stage, to the classroom... anywhere the music moves you.

The high quality of the UST-8C exceeds the strictest specifications of the Music Educators National Conference. It is particularly noted for its superior scale design and patented high-tech components.

Performance is the real test. The full, harmonic sound is favored by school leaders, church choirs and accomplished pianists around the world, who agree that the UST-8C is the studio piano of choice.

World-class performance, superior craftsmanship and exceptional value... now that's a Kawai.
