

Vari-Touch

The piano that adjusts to the player

Experienced pianists will tell you that all pianos are different. Each instrument has its own unique way of responding to a lighter, others heavier... and the differences can be quite dramatic. Many hours of careful adjustments by a skilled technician "just right" for a specific player. But if several pianists want to use the same piano, it would be impossible to please everyone.

Introducing the Vari-Touch Piano from Kawai. Just slide the lever to adjust the touch to suit the way you play. Beginners might select a light touch. Experienced players might select a heavier touch for rigorous practice. At home or in the practice room, it gives everyone the touch they need to find the touch that is right for them. The Vari-Touch Piano is the first piano to get it right with everybody.

FOR THE NOVICE

For children and beginning players who are still developing strength at the piano, the Vari-Touch Piano is an ideal choice. A heavy touch can cause them to tire easily and become discouraged. But by adjusting the Vari-Touch to a lighter setting, the keys move more easily... allowing them to practice longer with greater comfort and enjoyment. They can gradually move to a heavier touch as their strength and stamina increase.

EASY TO USE, LOW MAINTENANCE

Adjusting the Vari-Touch setting is easy! Simply slide the lever to gradually adjust the feel of the piano from light to firm and everything in between. The changes are instantaneous, with no special tools or disassembly required. And no special maintenance is necessary... the Vari-Touch Piano can be tuned and serviced by your regular piano technician.

FOR THE EXPERT

The Vari-Touch Piano is the perfect rehearsal piano for the skilled player. Never worry about making the adjustment from the practice room to the concert hall. Set the Vari-Touch Piano to simulate the touch of your performance piano and the transition will be seamless.

FOR THE MUSIC SCHOOL

In an institutional environment with multiple practice rooms, students won't have to wait around until their favorite piano becomes available. With its variable touch settings, the Vari-Touch Piano will become everyone's favorite.
